

LP® VISUALIZER CHEAT SHEET

How to operate the
LP® Building Solutions
Visualizer program
through K&K
Industries

**1. Go to www.kktruss.com
or scan QR code below**

**2. Choose "visualize your
project" and click on
"Exterior Visualizer"
or scan QR code**

If you need a reminder on how to use
the program, see the program tutorial.

**3. Choose "select a home
style" or "custom design"**

If choosing "custom design", see a K&K
sales rep about payment, courtesy of
K&K Industries.

Be sure to upload photos individually

4. Choose a home

If using the custom program, links
with your home images will be
emailed to you in 2-5 business days.

**5. Choose from the top 3
tabs**

- walls
- trim & fascia
- roof, doors & more

**6. Choose surfaces by
selecting the eye icon
and then clicking on the
corresponding words**

Clicking the icon will light up the area
that corresponds with the word
description next to it.

**7. Choose your type, style,
and color**

You may decide to use the
"recommended color set" tab

Choose "create your own" when picking
colors to see additional options

**8. Click 'compare' on the
image once one version is
complete**

Drag slider to one side to create
another house following steps 5-7. Click
compare again to compare versions,
dragging the slider. Download to save.

SW VISUALIZER CHEAT SHEET

How to operate the
Sherwin Williams
Visualizer program
through K&K
Industries

**1. Go to www.kktruss.com
or scan QR code below**

2. Choose "visualize your project" and click on "Interior Visualizer with Full Color Selection" or scan QR code

3. Choose visualizer based on device

If using a computer, skip this step. If changing to phone or iPad, click "try on colors", then choose device in the left menu. Follow download instructions. App will require using your own space (skip step 4).

4. Choose "use our photo"

K&K recommends using the default scenes for this program.

5. Add colors to bottom pallet

To add, click the '+' button on the color sample.

To see color pallet suggestions, select the color pallet on the color sample.

See the name and color code of each color through our partner, Sherwin Williams®.

6. Select color, then select surfaces to paint

Hint: press "close" in the top right corner of the visualizer when in program extensions to go back to your current photo design.

7. Toggle day/night-time options

Some default scenes allow users to view their scene in both day and night lighting!

8. Press "clear areas" or "more scenes" to start over with a new design

If you need a reminder on how to use the program, see the program tutorial. Download to save.
